## About Clone Studio

Cloning Your Imagination Into Any Form Of Digital Platform Is Our Main Goal. Our Experts Are Very Sincere About Their Activities As Well As Their Client.

Clone studio is a digital agency located in Bangladesh. We started back in the summer of 2021. Started with a small team, but now it becomes a big platform to serve any kind of demand in the virtual world! In our studio there are experts from various fields working together to deliver you a dream project. Our major four services are Web Development, App Development, Digital Marketing, and A to Z e-commerce solutions. We have already worked with 105+ clients and so many go on.

## Our Services

Web Development and UI/UX is the two faces of the same coin. A good web design cannot be done without a proper UI. Again a proper UI is not enough if it fails to be understandable by the users. So, UX also is a must. So, for building a good website we need to combine all three. Here, Clone Studio is the complete solution. We have UI/UX developer who helps the web developer continuously to deliver a project as your demand as well as valuable for the users.

### Web Development

Websites are very essential to grow your personal profile or organization. You must need to introduce your existence in the virtual world, right? Consult with us and make your journey easy.

### APP Development

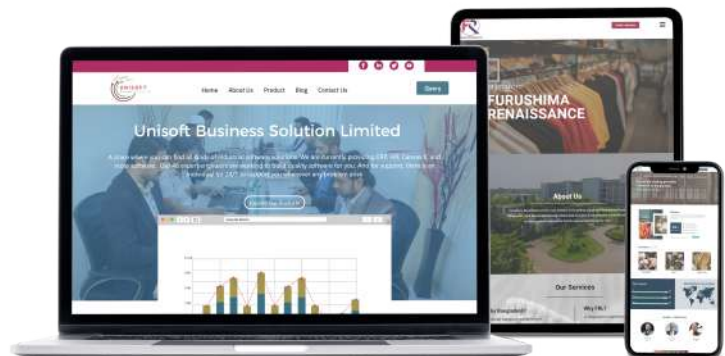

A mobile app can also improve your customer service, apart from increasing your product sales and business visibility. We develop apps from scratch with any functionalities you demand!

### UX Design

We design apps or websites from scratch. Our UI/UX team has the experience also the capability to match the design along with the functionalities demanded by the user.

### Digital Marketing

Branding is a trend. We are here to make your profile much richer. not only business profile we also work with making you a brand.

## How we Work

We work with a plan according to your demand need. We are 100% dedicated to delivering a project that meets all kind of necessary functionalities you need as well as meet your satisfaction.

We are dedicated to giving the best product. So we divide our entire task into some small modules that are described on the left-hand side. For knowing more about our services please click the button below.

### 1. Interactive Design

The first impression is the best impression. So we give the priority to designing a user-friendly UI at first. As well as we manage all the functionalities as per demand

### 2. Develop & Deploy

Then comes the time for coding, we starts to give the design a coding format so that it can be visible. After that deploy the code to a real server where the app or web site should be tested

### 3. Test Launch

Now time for the test launch. We deploy the software in a real server where you can interact with the app in real-time. Also, the general users can use the software and give us valuable feedback. So, if any features are needed we can add also if find any problem we can fix it

### 4. Make It Live

Now you go. Your project is done. It will be live but we are not done. We are going to give you 6-month premium support. So you do not need to worry about your app, we take care of it
